DETAILED ACTION

Allowable Subject Matter

Claims 1-20 and 46-67 are allowed.

The following is an examiner's statement of reasons for allowance:

The invention is directed to sending transaction information via a broadcasting channel from an electronic commerce system, receiving transaction request at an electronic commerce system via a network connection, such as Internet, and sending the transaction via a secure channel from the electronic commerce system to a server system of a business to which the transaction information relates.

The prior art of record, Pickett, teaches sending transaction information, via the Internet, to consumer from an electronic commerce, receiving transaction request at an electronic commerce, sending the transaction request and consumer information via secure channel from electronic commerce to server (credit card company). Pickett however does not teach sending the transaction information via a broadcasting channel and sending a transaction information to a server system of a business to which the transaction information relates as claimed in the independent claims 1 and 14. This uniquely distinct feature renders the claim allowable (see the decision on appeal by the BPAI).

Pickett also does teach sending transactional information along with broadcast data from an electronic commerce system through a broadcast communications medium, receiving a transaction request at the electronic commerce system forwarding the transactional information to a server system corresponding to the business for the transactional information securely over a

second transmission medium as claimed in the independent claims 46 and 58. This uniquely distinct feature renders the claim allowable (see the decision on appeal by the BPAI).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
